✨ Producer Utilities: Stems Renamer

This tool helps you quickly rename your Ableton stem files by removing unwanted prefixes and track numbers added during export. It works on all audio files in a folder and its subfolders.

If you downloaded this document from Grouped, head to my Github page to get this tool!

Feel free to DM or email me your suggestions for other boring steps in your music and content creation process to automate away! For music collaborations and K-pop pitching, contact me on Instagram.

🚀 Easy Setup Guide

1. Download Python, the programming language needed to run this tool.
2. Get Visual Studio Code, a program to open and run the code.
3. Download the tool:
   - Click the green **"Code"** button on this page.
   - Select **"Download ZIP"**.
4. Unzip the downloaded file to create a folder.
5. Open Visual Studio Code:
   - Click **"File"** > **"Open Folder..."**.
   - Select the unzipped folder and click **"Open"** (macOS) or **"Select Folder"** (Windows).
6. Open the file named `renamer.py` in Visual Studio Code.

🖱️ How to Use

1. Set the folder path where the stems are located:
   - **macOS**: Right-click a file or subfolder in the folder, select **"Get Info"**, then right-click

the path next to **"Where"** and choose **"Copy as Pathname"**. Open `renamer.py` , scroll to the bottom, and paste the path into the `folder_path` line.

- **Windows**: Right-click a file or subfolder in the folder, select **"Properties"**, highlight the path next to **"Location"**, and press **Ctrl+C** to copy. Open `renamer.py` , scroll to the bottom, and paste the path into the `folder_path` line.

2. Set the prefix to remove by editing the `prefix` line in `renamer.py` .
3. Click the Play button in Visual Studio Code to run the tool. See screenshot below.
